Hello John!

I want to share with you some facts that I learned about the Earth where we live. Did you know that

- the Earth's distance from the sun is 92,960,000 miles.
- it takes 365 days for the Earth to go around it's orbit.
- the Earth is the third planet from the sun.
- there are a lot of people on the earth: 6,840,507,003 at this time.
- the Earth is divided into three layers: crust, core and mantle.
- 71% of the Earth's surface is covered in water. (That doesn't leave a lot of room for the humans.)

Well, Jane, I got to go now. I hope you enjoy living on this watery globe of ours.

Sincerely,

Hammy
